
Usability Test

Project name: My Website App

Version: 1.0

Tester Name:

Helena Kantorska

Marking scheme:

1 – very hard

2 – hard

3 – medium

4 – easy

5 – very easy

Please give representative grades to questions:

- | | | |
|---|--------|---|
| 1. How easy was the app to use in general? | grade: | 5 |
| 2. How hard was the app description to understand? | grade: | 5 |
| 3. How easy was to change the font colour? | grade: | 5 |
| 4. How easy was to change the colour of the background? | grade: | 3 |
| 5. How easy was to navigate through the app? | grade: | 4 |

6. What would you change to the app?

The app is easy to use in general, but I was a little bit confused what to do when.
I know that I have freedom to use this app in any order, but at first time I was just confused.
And probably many people don't know what to type in to the field called "description" ...
Was it necessary to type in anything at all?
Overall the app is nice.

Internal use only

Recommendations based on usability test:

Recommendations		Reason
1.	Default text in “description” box	The user pointed out that at the first use of this app some users could have problem to write down some sort of personal description. Some default text, maybe with some guidance would be helpful.
