
Usability Test

Project name: My Website App

Version: 1.0

Tester Name:

Mikolaj Obara

Marking scheme:

1 – very hard

2 – hard

3 – medium

4 – easy

5 – very easy

Please give representative grades to questions:

- | | | |
|---|--------|---|
| 1. How easy was the app to use in general? | grade: | 5 |
| 2. How hard was the app description to understand? | grade: | 5 |
| 3. How easy was to change the font colour? | grade: | 5 |
| 4. How easy was to change the colour of the background? | grade: | 5 |
| 5. How easy was to navigate through the app? | grade: | 5 |

6. What would you change to the app?

More font colours to choose? I like the freedom to pick the colour of a background, exactly I want. And in general, more options to customise the look of the website would be nice.

Recommendations based on usability test:

| Recommendations | | Reason |
|-----------------|-----------------------------|---|
| 1. | Font colour – more options | There can be more colours available to choose for font colours. It can be done exactly in the same way, like background colour system dialog box. |
| 2. | More features in the future | Definitely more features to customise the look of the website will raise the value of this software, but more feedback from the bigger group of the test users is needed. |
